Product Description

The Netis P112GS is an 8-port PoE Gigabit switch designed for home, office, and business networks. It features 8×10/100/1000M PoE ports, 2 uplink RJ45 ports, and 2 SFP uplink slots for high-speed, reliable network connectivity. With a 20G switching capacity and 8K MAC address table, this PoE switch ensures stable data transmission and supports multiple devices efficiently. Its plug-and-play design makes installation simple, ideal for IP cameras, access points, and network expansion.
